# COMMERCIAL REBATE PROGRAM

## Chiller Incentives

### To Calculate Your Chiller Rebate

**Unit Quantity × Unit Tonnage × Incentive (\$/ton based on unit efficiency) = Total Rebate**

For example, if you are installing two 200-ton Air Cooled Chillers at 11.2 EER with a 14.1 IPLV:

2 units × 200 tons × \$75/ton = \$30,000

Please review full program requirements and equipment eligibility at [austinenergy.com/go/commercial](http://austinenergy.com/go/commercial)

Chillers may be designed to run at full-or part-load. Chillers that operate at standard full load follow 'Path A' compliance in building energy code, whereas chillers that operate at part-load follow 'Path B'. Chillers that are eligible for both paths should select the higher incentive rate.

### Air Cooled Chiller

Path A - Air Cooled Chiller			
Unit Size (tons)	Minimum Efficiency (EER)	Minimum IPLV	Incentive (\$/ton)
Less than 150	10.2	13.8	\$15
